Mail Stop AMENDMENT
 Commissioner for Patents
 P.O. Box 1450
 Alexandria, VA 22313-1450

Dear Sir:

Transmitted herewith is a Statement of Substance of Interview in the above-identified application.

- ☒ No additional fee is required.
☐ Applicant is entitled to small entity status under 37 CFR 1.27
☐ Also attached:

The fee has been calculated as shown below:

	NO. OF CLAIMS	HIGHEST PREVIOUSLY PAID FOR	EXTRA CLAIMS	RATE	FEE
Total Claims			0	\$50.00	\$0.00
Independent Claims			0	\$200.00	\$0.00
Search Fee					\$0.00
Examination Fee					\$0.00
Fee for extension of time					\$0.00
Total of Above Calculations					\$0.00

- ☐ Please charge my Deposit Account No. 502624 in the amount of \$0.00. An additional copy of this transmittal sheet is submitted herewith.
☒ The Commissioner is hereby authorized to charge payment of any fees associated with this communication or credit any overpayment, to Deposit Account No. 502624, including any filing fees under 37 CFR 1.16 for presentation of extra claims and any patent application processing fees under 37 CFR 1.17.

Respectfully submitted,
 McDERMOTT WILL & EMERY LLP

STATEMENT OF SUBSTANCE OF INTERVIEW

Mail Stop AMENDMENT
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

In response to the interview summary mailed on December 28, 2005, Applicant hereby provides a statement of the substance of the interview as follows.

Although no firm agreement was reached during the interview on December 22, 2005, Applicant's representative was provided the opportunity to discuss the present invention and references discovered by the Examiner and brought to Applicant's attention.

The present invention as currently claimed, for example, in claim 12, relates to a mobile station for use in a CDMA mobile communications system comprising a receiver which receives a wireless signal transmitted by a sector or a base station. A CDMA modem is connected to the receiver, which performs a despreading modulation operation of the wireless signal received by the receiver. A controller controls a pilot synchronization operation including an acquisition of a pilot signal and a registration operation that includes a plurality of access sequences to the sector or the base station when the acquisition of a pilot signal is successful, and turns off the receiver when the

09/702,722

mobile station fails in registration to the sector, or the base station after the registration operations are performed a pre-determined number of times.

Neither of the references U.S. Patent No. 5,507,039 nor U.S. Patent No. 6,115,582, show or suggest such features.

In other words, neither reference describes the controller that performs the registration operation that includes a plurality of access sequences when the acquisition of a pilot signal is successful, but turns off the receiver when the mobile station fails in registration after the registration operations are performed the predetermined number of times. Neither the '039 nor the '582 patent disclose or suggest anything regarding procedures to take after successful acquisition of a pilot signal, but failure in registration after trying to register a predetermined number of times.

For the above reasons, and those presented in detail in the most recently filed response, the present application should be considered in condition for allowance over the art of record and the references discussed above. Accordingly, this application should be considered in condition for allowance and the case passed to issue.

To the extent necessary, a petition for an extension of time under 37 C.F.R. 1.136 is hereby made. Please charge any shortage in fees due in connection with the filing of this paper, including extension of time fees, to Deposit Account 502624 and please credit any excess fees to such deposit account.

Respectfully submitted,

McDERMOTT WILL & EMERY LLP
